EDUCATION

Doctor of Philosophy (Ph.D.) National University of Singapore	Jul. 2025 (expected) Singapore
<ul style="list-style-type: none">• Majored in Computer Science• President's Graduate Fellowship• Published paper at AAAI 2022• Published two papers at ICASSP 2022• Submitted two papers at IJCAI 2022• Submitted two papers at ICML 2022	
Master of Engineering (M.Eng.) Nanyang Technological University	Jul. 2021 Singapore
<ul style="list-style-type: none">• Majored in Computer Science and Engineering• Thesis: Refining latent multi-view graph for relation extraction• GPA: 5.0/5.0• Published paper at AAAI 2021• Published paper at ICML 2020	
Bachelor of Engineering (B.Eng.) Harbin Engineering University	Jul. 2020 Harbin, China
<ul style="list-style-type: none">• Majored in Computer Science and Technology• 6 times University First-Class Scholarship• 4th Place of China AI Futurelab Contest• 2nd Prize of 2017 National Robot and Artificial Intelligence Competition "Human-like Robot Dash Project"• National University of Singapore Summer Workshop	
Grade: A	Singapore

PROFESSIONAL EXPERIENCE

National University of Singapore Singapore Ph.D. Student	Jul. 2021-Present
<i>In charge of efficient and effective general training framework for both computer vision and natural language processing to scale transformer. Published at AAAI 2022. Submitted at IJCAI 2022, ICML 2022.</i>	
<ul style="list-style-type: none">• Proposed to go wider instead of deeper, compressing along depth by parameter sharing and scaling along width by mixture-of-experts to construct a parameter-efficient framework.• Proposed knowledge integration to integrate knowledge from pretrained MoE into dense student for a dense model, which is efficient and hardware-friendly as other dense model but is as effective as MoE counterpart.• Proposed sequence parallelism to train transformer with longer sequence from system perspective.	
Nanyang Technological University Singapore M.Eng. Student	Jul. 2020-Jun. 2021
<i>In charge of design of improving dialogue-level relation extraction by adaptive graph pooling proposed. Published paper at AAAI 2021</i>	
<ul style="list-style-type: none">• Identified indicative words using Dynamic Time Wrapping Pooling in an unsupervised manner with high accuracy.• Improved the state-of-the-art of dialogue-level relation extraction by 6% on DialogRE.	
National University of Singapore Singapore Research Intern	Oct. 2019-Apr. 2020
<i>In charge of design of hybrid speech recognition framework with utilization of Pytorch and Kaldi. Published paper at ICML 2020</i>	
<ul style="list-style-type: none">• Used Pytorch underlying operations to implement acoustic models such as DNN, LSTM, SRU, RRN and RTN.• Modeled relational thinking through Deep Graph Process, reducing WER by 10% relatively on Chime2, Chime5 and SWBD.	
National University of Singapore Summer Workshop Singapore	Jul. 2018-Aug. 2018
<i>Designed fire-fighting trolley with automatic driving, speaker recognition, target detection, image classification, automatic obstacle avoidance, semi-automatic driving with manual driving, voice control, and fully automatic driving. Grade: A</i>	
<ul style="list-style-type: none">• Solved problem of image uploading speed of trolley through MQTT protocol being way faster than model recognizing speed, and significantly reduced latency from 9s to 2s.• Preprocessed all audio data with sox as well as modeled first 0.25s of each channel voice and uniformed sampling rate, improved speech recognition and voiceprint recognition and audio data quality.	

SKILLS

- **Programming:** Python, C/C++, C#, Matlab
- **Frameworks:** TensorFlow, PyTorch, Keras, Theano, Scikit-learn, pandas, OpenCV
